

# **TR-41 Activities**

---

**in support of  
ACTA**

# Standards

---

- ◆ SP-3-0005 (TIA/EIA-968) *Technical Requirements for Connection of Terminal Equipment to the Telephone Network*
  - TIA ballot closes May 3, 2001.
  - ANSI ballot closes June 4, 2001
- ◆ PN-3-0010 (TIA/IEA-IS-883) *Supplemental Criteria for Stutter Dial Tone Detection Devices and DSL Modems to Prevent Harm to the Telephone Network*
  - TIA ballot closed April 30, 2001
- ◆ Both documents created by TR-41.9 (TR-41.9.1 WG) and circulated to T1E1 and TCB Council in addition to TIA members in order to develop industry consensus.

# Bulletin

---

- ◆ PN-3-0014 (TIA/EIA-TSB-168) *Labeling Requirements*
  - TIA ballot closed on April 30, 2001
  - Created by TR-41.11 and circulated to T1E1 and TCB Council in addition to TIA members in order to develop industry consensus.

# Administrative Guide for SDoC

---

- ◆ Project to create an Administrative Procedures Guide for SDoC, similar to the Part 68 Application Guide currently available on the TIA web site, is under consideration.
  - The intent would be to document the supplier's responsibilities in creating an SDoC and the process for submitting it to ACTA.
  - TR-41.11 has already submitted its recommendation to ACTA concerning the content and format of the SDoC document.

# Database

---

- ◆ TR-41.11 has reviewed the information currently collected using Form 730 when submitting a Part 68 application and has prepared a list of those items it believes should continue to be collected and retained in the database.
- ◆ Input has been requested from USTA and T1E1 on the list.
- ◆ TR-41.11 expects to forward its recommendation regarding database contents in the near term to ACTA following next week's co-located TR-41 and T1E1 meetings.
- ◆ There have been discussions about future directions the database might take, but there are no agreed upon industry recommendations at this time.
