## **6) Database Working Group**

a) Adopt Website Access & Entry Plan (ACTA-01-06-27-04)

Tim Jeffries introduced Contribution ACTA-01-06-27-04, and noted that in order to proceed with the turnover from the FCC to ACTA, the ACTA needs to agree on a method for database access and database entry. It was moved that the ACTA accept the last two paragraphs from the first page of Contribution ACTA-01-06-27-04 as that method. The motion was accepted and passed unanimously.

***AGREEMENT REACHED #4: ACTA accepted the recommendations of the Database Working Group regarding the method for database access and database entry. That method is described below.***

***With respect to the method for database access, and overall design, the working group agreed to monitor the ACTA website as presently presented, and collect information for analysis. Pertinent details such as defining the typical ‘end-users’ and the information they seek to obtain from the database (i.e., website) are essential to ascertain what data needs to be delivered, and how it’s presented. Once a sufficient amount of information is collected from this monitoring process, the db-WG will revisit the issue and devise recommendations for the Council’s review.***

***Data entry in the ‘main’ ACTA database will be limited to the ACTA Secretariat, initially. Work to create an efficient interface for TCB and SDoC input and updates to the ‘main’ database will continue. ACTA will be updated as work progresses.***
