## **PUBLIC NOTICE**

### **ACTA REVISES OPERATING PRINCIPES & PROCEDURES EFFECTIVE JANUARY 2021**

February 4, 2021

Effective January 2021, the Administrative Council for Terminal Attachments (ACTA) approved Version 6.0 of ACTA Operating Principles & Procedures (OP&P). A summary of changes to the OP&P is below. This document supersedes all previous versions.

OP&P Version 6.0, Summary of Changes:

- Streamline and remove unnecessary and duplicative text, clarify use of electronic tools, and clearly reflect other current ACTA processes;
- Create a new Vice Chair position to provide additional leadership for the ACTA; and
- Eliminate the Executive Committee, which was considered unnecessary in light of the overlap of membership on the Executive Committee and General Council.

The revised procedures are posted on the ACTA website at <https://www.part68.org>.

Questions and comments about this notice should be submitted to the ACTA Secretariat via e-mail at [acta@atis.org](mailto:acta@atis.org), or by phone at +1.202.628.6380

#### **About ACTA**

The ACTA is an open organization established to: (1) adopt technical criteria and to act as the clearing-house, publishing technical criteria for terminal equipment developed by ANSI-accredited standards development organizations; and (2) establish and maintain a registration database of equipment approved as compliant with the technical criteria. ACTA is jointly sponsored by the Alliance for Telecommunications Industry Solutions (ATIS) and Telecommunications Industry Association (TIA).
